Ch 13 Test (Set B): Our Environment

Chapter / Topic: Our Environment

Name: _____ Roll No.: _____ Date: _____

Time: 50 minutes **Max. Marks: 25**

General instructions:

1. All questions are compulsory. Internal choice is given in some questions.
2. Section A: 1 mark each. Section B: 2 marks each. Section C: 3 marks each. Section D: 5 marks. Section E: case-based, 4 marks.

SECTION A

6 marks

Choose the correct option.

Q1. Which of the following is an artificial ecosystem? **[1]**

(a) Forest (b) Crop field
(c) Pond (d) Lake

Q2. Organisms that break down the dead remains of plants and animals are called: **[1]**

(a) producers (b) herbivores
(c) carnivores (d) decomposers

Q3. In the food chain grass → deer → tiger, the tiger is a: **[1]**

(a) producer (b) primary consumer
(c) decomposer (d) secondary consumer

Q4. Which of these is a good way to manage household waste? **[1]**

(a) Composting kitchen waste (b) Burning plastic
(c) Dumping waste in rivers (d) Mixing all waste together

Q5. Green plants capture about what percentage of the sunlight that falls on their leaves? **[1]**

(a) 1% (b) 10%
(c) 50% (d) 90%

Q6. **Assertion (A):** Pesticides are found in high concentrations in human beings.
Reason (R): Pesticides are biodegradable. **[1]**

(a) Both A and R are true, and R is the correct explanation of A.
(b) Both A and R are true, but R is not the correct explanation of A.
(c) A is true, but R is false.
(d) A is false, but R is true.

SECTION B

4 marks

Q7. What will happen if all the organisms in one trophic level are killed? **[2]**

OR

Why are crop fields and gardens called artificial ecosystems?

Q8. Give two harmful effects of using too many pesticides. **[2]**

SECTION C

6 marks

Q9. Study the pond food chain: phytoplankton → zooplankton → small fish → big fish **[3]**

(i) At which trophic level is the small fish? **[1]**

(ii) If the phytoplankton capture 50,000 J of energy, how much energy is available to the big fish? **[1]**

(iii) Why are there far fewer big fish than small fish in the pond? **[1]**

Q10. How have changes in our lifestyle increased the amount of waste we produce? Suggest two ways to reduce it. **[3]**

OR

Describe the role of decomposers in recycling nutrients in an ecosystem.

SECTION D

5 marks

Q11. Answer the following: **[5]**

(i) Explain biological magnification with an example of a food chain. **[3]**

(ii) Why are human beings especially affected by biological magnification? **[2]**

OR

(a) Give two differences between natural and artificial ecosystems, with two examples of each. [2]

(b) Why does an aquarium need regular cleaning, while a pond or lake does not? [3]

SECTION E

4 marks

Read the passage and answer the questions that follow.

Q12. A housing society started separating its waste. Every flat now uses a green bin for wet waste and a blue bin for dry waste. The wet waste is composted in the society garden, and the dry waste is collected by a recycler every week. Within three months, the garbage sent to the city dump fell by more than half. **[4]**

(i) Name two items that go into the green (wet waste) bin. **[1]**

(ii) Name two items that go into the blue (dry waste) bin. **[1]**

(iii) How does separating waste help the environment? **[2]**

~ All the best! ~
