LEVEL UP ACADEMY

Class 10 | CBSE / GSEB | Science

Most-Expected Questions: Biology (Ch 5–8, 13)

Chapter / Topic: Life Processes · Control and Coordination · Reproduction · Heredity · Our Environment

Name: _____ Roll No.: _____ Date: _____

Marks obtained: _____

General instructions:

1. These are the question types that come up again and again in board papers. Answer them in your notebook, then check with the answer key.
2. Biology answers score with keywords. Underline the technical terms in your answers.

1-MARK QUESTIONS

Q1. Name the energy currency of the cell.

Q2. Where is bile stored?

Q3. Name the tissue that carries water in plants.

Q4. Which part of the brain maintains posture and balance?

Q5. Which part of a flower develops into the seed?

Q6. Name the scientist who worked out the rules of inheritance using pea plants.

Q7. What forms the first trophic level of every food chain?

Q8. Which gas in the upper atmosphere absorbs harmful UV rays?

2-MARK QUESTIONS

Q9. Give two differences between autotrophic and heterotrophic nutrition.

Q10. How do guard cells open and close the stomatal pore?

Q11. Name the components of blood and give one function of each.

Q12. Which signals are disrupted if the spinal cord is injured?

Q13. What are the functions of the testes in human beings?

Q14. Give two reasons for using contraceptive methods.

Q15. What is DNA, and where is it found in a cell?

Q16. What are trophic levels? Name the trophic levels in the food chain grass → goat → human.

3-MARK QUESTIONS

Q17. How do auxins help a tendril coil around a support?

Q18. Compare the alveoli in the lungs with the nephrons in the kidneys, in structure and function.

Q19. Why is DNA copying an essential part of reproduction?

Q20. What are the functions of the forebrain?

Q21. If all the waste we produced were biodegradable, would it have no impact on the environment? Explain.

Q22. What is the role of decomposers in an ecosystem?

5-MARK QUESTIONS

Q23. (a) Describe the experiment that shows carbon dioxide is essential for photosynthesis. [3]
(b) Write the equation for photosynthesis and name its three main events. [2]

Q24. (a) Describe the human excretory system and the function of each organ. [2]
(b) Explain how urine is formed in a nephron. [3]

Q25. (a) Explain Mendel's monohybrid cross with a checkerboard, giving the F_1 and F_2 results. [3]
(b) How do Mendel's results show that traits can be dominant or recessive? [2]

~ Keywords win marks in Biology. Use the textbook terms! ~
