LEVEL UP ACADEMY

Class 10 | CBSE / GSEB | Science

Class 10 Science: 90-Day Board Revision Plan

Starts Monday 9 November 2026 · 13 weeks · finishes 7 February 2027. If you start later, keep the order and shift the dates. Every chapter in this plan has a **revision sheet** and a **25-mark chapter test** in the Level Up Academy library.

Phase 1: Chapter by chapter (Weeks 1–7)

Week	Dates	Chapters	Test at the end of the week
1	9–15 Nov	Ch 1 Chemical Reactions · Ch 2 Acids, Bases and Salts	Ch 1 + Ch 2 tests
2	16–22 Nov	Ch 3 Metals and Non-metals · Ch 4 Carbon and its Compounds	Ch 3 + Ch 4 tests
3	23–29 Nov	Ch 5 Life Processes · Ch 6 Control and Coordination	Ch 5 + Ch 6 tests
4	30 Nov–6 Dec	Ch 7 Reproduction · Ch 8 Heredity · Ch 13 Our Environment	Ch 7, 8, 13 tests
5	7–13 Dec	Ch 9 Light: Reflection and Refraction · Ch 10 Human Eye	Ch 9 + Ch 10 tests
6	14–20 Dec	Ch 11 Electricity · Ch 12 Magnetic Effects	Ch 11 + Ch 12 tests
7	21–27 Dec	Catch-up week: redo your 3 weakest chapters · diagrams day · numericals day	Re-test of weakest chapters

Phase 2: Board-style practice (Weeks 8–11)

Week	Dates	Focus
8	28 Dec–3 Jan	Full mock 1 (CBSE or GSEB pattern, 3 hours) → mark it → error log
9	4–10 Jan	Section drills: CBSE: case-based + assertion–reason · GSEB: objective (MCQ, blanks, true/false)
10	11–17 Jan	Full mock 2 (new set) → compare with mock 1 → fix the top 5 mistakes
11	18–24 Jan	Previous years' board papers (2 papers, timed) · revise the error log

Phase 3: Final polish (Weeks 12–13)

Week	Dates	Focus
12	25–31 Jan	All 13 revision sheets (2 a day) · equation sheet · diagram sheet · one 25-mark test every other day
13	1–7 Feb	Light revision only · error log · sleep routine · no new topics

Daily routine (about 1.5 hours of Science)

- **30 min:** read the revision sheet + textbook for today's topic.
- **40 min:** practise questions without looking at the book (exercise questions, then the chapter test).
- **10 min:** draw and label one diagram from memory.
- **10 min:** write today's mistakes in your **error log** (last page).

Exam-day strategy. Use the reading time to plan: mark the questions you're sure of.
Attempt what you know best first, but keep question numbers exactly as in the paper.
Time guide for 3 hours / 80 marks: about 2 minutes per mark, plus 15 minutes to check at the end.
Numericals: formula → substitution → answer **with unit**. Equations: balanced, with states if asked.
Diagrams: pencil, neat labels.

My targets

My target in Science: _____ / 80. My three weakest chapters right now:

My error log

Write every mistake from tests and practice here. Read this page every Sunday, and again the night before the exam.

Date	Chapter	What I got wrong	The correct idea
