Class 8 | CBSE / GSEB | Science

Practice Pack: Combustion and Flame

Chapter / Topic: Topic-based: use with whichever Class 8 book your students follow

Name: _____ Roll No.: _____ Date: _____

Marks obtained: _____

General instructions:

1. Part A checks the basics. Part B makes you think and apply.
2. Calorific value = heat produced ÷ mass of fuel burnt (unit: kJ/kg).

PART A: BASICS

Q1. What is combustion? List the three things needed for it.

Q2. What is ignition temperature?

Q3. Name the three zones of a candle flame and say which is the hottest.

Q4. Why is water not used to put out fires caused by electricity or oil?

Q5. Give two characteristics of an ideal fuel.

PART B: THINK AND APPLY

Q6. 4.5 kg of a fuel burns completely and produces 180,000 kJ of heat. Find its calorific value.

Q7. Why is carbon dioxide the best extinguisher for fires involving electrical equipment and petrol?

Q8. Why does a matchstick catch fire when rubbed on the side of a matchbox?

Q9. A paper cup filled with water can be heated over a flame without burning. Explain.

Q10. Why is it dangerous to burn coal or wood in a closed room?

Q11. Give two harmful effects of burning fuels on the environment.

~ Fuel + oxygen + heat = fire. Remove any one and the fire goes out! ~
