Class 8 | CBSE / GSEB | Science

Unit Test: Metals and Non-metals

Chapter / Topic: Metals and Non-metals (topic-based)

Name: _____ Roll No.: _____ Date: _____

Time: 45 minutes **Max. Marks: 25**

General instructions:

1. All questions are compulsory.
2. Section A: 1 mark each. Section B: 2 marks each. Section C: 3 marks each. Section D: 5 marks.
3. Word equations are enough unless a chemical equation is asked for.

SECTION A

6 marks

Choose the correct option.

Q1. Which metal is so soft that it can be cut with a knife? **[1]**

(a) Iron (b) Copper
(c) Aluminium (d) Sodium

Q2. A solution of which non-metal is applied on wounds as an antiseptic? **[1]**

(a) Sulphur (b) Carbon
(c) Iodine (d) Phosphorus

Q3. Which non-metal do we take in when we breathe? **[1]**

(a) Oxygen (b) Nitrogen
(c) Carbon (d) Hydrogen

Q4. Coating iron with a layer of zinc is called: **[1]**

(a) painting (b) galvanisation
(c) rusting (d) electroplating with copper

Q5. The green coating on copper vessels left in moist air is: **[1]**

(a) rust
(b) copper sulphate
(c) copper chloride
(d) a mixture of copper hydroxide and copper carbonate

Q6. Which gas is produced when metals react with dilute acids? **[1]**

(a) Oxygen (b) Carbon dioxide
(c) Hydrogen (d) Nitrogen

SECTION B

8 marks

Q7. Why are electric wires made of copper, but covered with plastic? **[2]**

Q8. Why should lemon pickle not be stored in aluminium or iron containers? **[2]**

Q9. An iron nail is placed in copper sulphate solution. What do you observe, and what does it show? **[2]**

Q10. Give two uses each of metals and non-metals. **[2]**

SECTION C

6 marks

Q11. Write word equations for what happens when: (i) sodium is put in water, (ii) a magnesium ribbon burns in air, (iii) sulphur burns in air. **[3]**

Q12. The ash of a burnt magnesium ribbon is dissolved in water, and so is the gas from burning sulphur. Each solution is tested with litmus. What do you observe, and what can you conclude? **[3]**

SECTION D

5 marks

Q13. Answer the following: **[5]**

(i) What is a displacement reaction? Give two examples as word equations. **[3]**

(ii) Will a reaction take place in each case? Give a reason. (i) Iron + zinc sulphate solution (ii) Zinc + iron sulphate solution **[2]**

~ All the best! ~
