Class 8 | CBSE / GSEB | Science

## Practice Pack: Combustion and Flame

*Chapter / Topic: Topic-based: use with whichever Class 8 book your students follow*

Name: _____ Roll No.: _____ Date: _____

**Marks obtained:** _____

---

**General instructions:**

1. Part A checks the basics. Part B makes you think and apply.
2. Calorific value = heat produced ÷ mass of fuel burnt (unit: kJ/kg).

### PART A: BASICS

**Q1.** What is combustion? List the three things needed for it.

**Q2.** What is ignition temperature?

**Q3.** Name the three zones of a candle flame and say which is the hottest.

**Q4.** Why is water not used to put out fires caused by electricity or oil?

**Q5.** Give two characteristics of an ideal fuel.

### PART B: THINK AND APPLY

**Q6.** 4.5 kg of a fuel burns completely and produces 180,000 kJ of heat. Find its calorific value.

**Q7.** Why is carbon dioxide the best extinguisher for fires involving electrical equipment and petrol?

**Q8.** Why does a matchstick catch fire when rubbed on the side of a matchbox?

**Q9.** A paper cup filled with water can be heated over a flame without burning. Explain.

**Q10.** Why is it dangerous to burn coal or wood in a closed room?

**Q11.** Give two harmful effects of burning fuels on the environment.

*~ Fuel + oxygen + heat = fire. Remove any one and the fire goes out! ~*
